Updated 1 May 2009

Level I and II Trauma Centers in Maryland are beyond the transport distances identified in the protocol. For inter facility or disaster operations, air ambulance operators must contact SYSCOM on 44.74 when transporting trauma patients into Maryland.

The New York State trauma center accreditation process is not similar to the trauma center accreditation process used in the Commonwealth of Pennsylvania. New York trauma centers are not eligible to receive Pennsylvania trauma patients in accordance with the Pennsylvania statewide protocol.
